

SHEIK NIFLA J

Junior SOC Analyst | Security Analyst | Threat Detection & Incident Response | GRC

jsheiknifla@gmail.com | +91 9342249634 | Coimbatore, Tamil Nadu | linkedin.com/in/sheiknifla7 | github.com/jsheiknifla

PROFESSIONAL SUMMARY

Cybersecurity student with hands-on internship experience across Security Operations Center (SOC) operations, threat detection, threat hunting, incident response, incident investigation, and Governance, Risk, and Compliance (GRC). Skilled in security monitoring, alert triage, log analysis and correlation, IOC analysis, threat intelligence, vulnerability assessment and management, and digital forensics, with working knowledge of SIEM platforms (including Splunk), MITRE ATT&CK, network and endpoint security, and ISO 27001 control mapping. Seeking a Junior SOC Analyst / Security Analyst / Threat Detection Analyst role to apply threat detection, incident response, vulnerability management, and risk assessment skills within a professional security operations team.

SKILLS

- SOC Operations & Security Monitoring: SOC Operations, Security Operations Center, Security Monitoring, Security Analytics, Log Analysis, Log Correlation, Alert Triage, IOC Analysis, Incident Response, Incident Handling, Incident Investigation
- Threat & Vulnerability Management: Threat Detection, Threat Intelligence, Threat Hunting, Vulnerability Assessment, Vulnerability Management, CVSS, Penetration Testing, MITRE ATT&CK, OWASP Top 10
- SIEM, Forensics & Network Security: Splunk, SIEM, IDS, Digital Forensics, Network Security, Endpoint Security, Wireshark, Nmap, Metasploit, Burp Suite, OWASP ZAP, Nikto
- GRC & Compliance: ISO 27001, Governance Risk and Compliance (GRC), Control Mapping, Risk Assessment, Audit Readiness, Compliance Documentation, Security Controls, Security Reporting
- Platforms & Programming: Kali Linux, Ubuntu, Linux Security, Windows Security, Python (Automation & Scripting), Bash

EXPERIENCE

Chief Documentation & Compliance Officer (CDCO) - NullGrid Labs

April 2026 - Present

- Create and maintain 10+ ISO 27001-based security policies, SOPs, and compliance documents, applying control mapping and GRC methodologies to support audit readiness and security governance.
- Perform control mapping and risk documentation for 15+ risk items across 3+ compliance review cycles, applying ISO 27001 risk assessment frameworks to strengthen traceability and audit-ready reporting.

Cybersecurity Intern - InternXcel Innovations Pvt Ltd

April 2026 - June 2026

- Conducted vulnerability assessments across 10+ test environments, applying CVSS scoring to classify findings by severity and deliver remediation-focused vulnerability management reporting.
- Correlated 20+ indicators of compromise (IOCs) against MITRE ATT&CK techniques and produced 5+ security assessment reports detailing attack vectors, exploitation impact, and remediation guidance.

Cybersecurity Intern - Syntexchub

May 2026 - June 2026

- Monitored security events, performed alert triage, and analyzed indicators of compromise (IOCs) to support threat detection and incident investigation within SOC-style security monitoring workflows.
- Authored security operations procedures and documentation covering security monitoring, log analysis, and incident-handling workflows, improving consistency and readiness across the security team.

Cybersecurity Intern - Thiranex

May 2026 - June 2026

- Investigated security incidents using digital forensics techniques, including log analysis and root-cause analysis, to determine scope of compromise and support incident response and remediation.
- Monitored systems for suspicious activity and indicators of compromise (IOCs), supporting incident response and threat investigation efforts to assist timely identification of compromised systems.

Cybersecurity Intern - Codec Technologies India

May 2026 - June 2026

- Performed security analysis and vulnerability assessments across target systems, applying vulnerability management practices to identify exploitable weaknesses and evaluate potential security impact.
- Delivered security reports detailing detected threats, vulnerability findings, and recommended remediation actions, enabling stakeholders to prioritize risk mitigation.

Cybersecurity Intern - Pynevera Pvt Ltd

June 2025 - July 2025

- Identified and validated 10+ web application vulnerabilities, including SQL Injection and Cross-Site Scripting (OWASP Top 10), using Burp Suite and OWASP ZAP for web application security testing.
- Contributed to risk assessment activities across 2+ application modules, applying CVSS-based severity ratings and producing compliance documentation to support vulnerability management.

Cybersecurity Intern - Future Interns

May 2026 - June 2026

- Completed a hands-on cybersecurity internship program covering security operations, threat detection, and vulnerability assessment fundamentals within a structured training environment.
- Applied core security monitoring and incident response concepts, including log review and risk identification, to build practical SOC-aligned analytical skills.

PROJECTS

Sentinel - AI-Powered Intrusion Detection System | Python, Machine Learning, IDS, Network Security

- Developed an AI-powered intrusion detection system applying machine learning for threat classification and anomaly detection, using feature engineering and model optimization to generate real-time alerts on malicious network activity.

SIEM ThreatWatch - Real-Time Threat Detection System | SIEM, Windows Event Logs, Flask, SQLite

- Built a SIEM-inspired threat monitoring platform collecting and analyzing Windows Event Logs for suspicious behavior, implementing automated alerting, incident tracking, and a security monitoring dashboard.

Threat & Incident Management Framework | MITRE ATT&CK, Threat Intelligence, Incident Response

- Designed a threat and incident management workflow aligned with SOC operations, implementing IOC tracking and MITRE ATT&CK technique mapping to improve incident documentation and response tracking.

Aegis - AI-Powered Vulnerability Scanner | Python, Security Testing, CVSS

- Developed an automated vulnerability scanner for web application assessment, detecting SQL Injection and Cross-Site Scripting (OWASP Top 10) with risk scoring and remediation reporting.

EDUCATION

Bachelor of Engineering, Computer Science and Engineering (Cybersecurity) | United Institute of Technology | CGPA: 8.56/10 | Expected 2027

CERTIFICATIONS

Cisco Cybersecurity Essentials and Introduction to Cybersecurity (Cisco Networking Academy) | Introduction to Digital Forensics (Security Blue Team) | OWASP Top 10 (Hands-on Practical Study) | TryHackMe Pre-Security Path and SOC Level 1 Path
